

The following **LIST OF PATENTS** covers technologies that utilize ENERGY forms that should be of vital concern should they be used in an unethical format (and we all know that, if it can be used, it will be used....). Many of these technologies have the ability to probe and affect our most coveted self identifiers --- our thoughts, and behavior. Everyone needs to become aware of technologies that are a potential threat to self-sovereignty or “individualistic” freedom. With the capability to implement some of these technologies through orbiting **Satellites**, if used improperly, they could be used to manipulate the masses. Please **NOTE**, this list only covers patents up to around the year 2000, so this list is only an inkling of what really exists and would most probably pale in comparison to the CLASSIFIED material that governments hold in their coffers.
